

ASSEMBLY INSTRUCTIONS

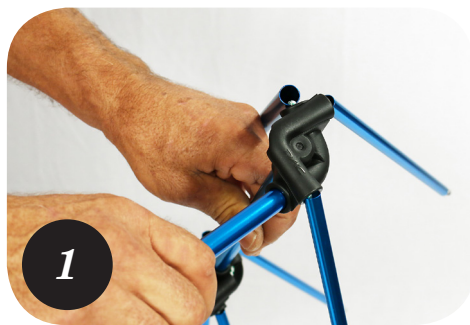

# Table One, Table One Hard Top & Table One Large

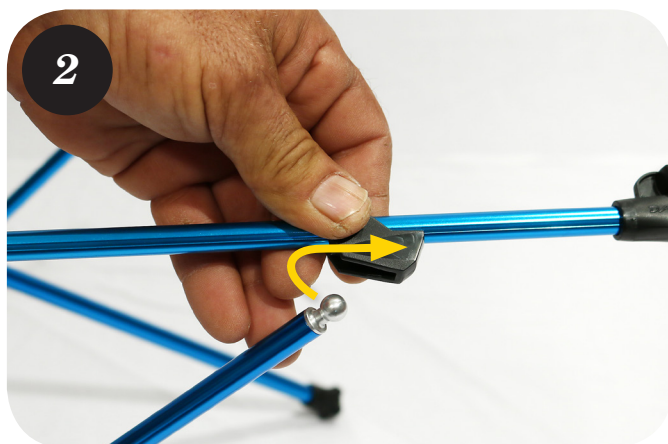

Assembly instructions are printed on the inside of the carry bag – so you'll never lose them!

Clip one end of the table top to the brackets at one end of the frame.

Assemble the table frame by locating the poles into the hubs.

Assemble the two upper support poles. Slide the round knobs into the each of the 4 brackets.

At this stage the upper poles will be slightly apart at the join. This gap will close up when the table top is fitted.

Clip the other end of the table top to the frame. This requires compressing the upper support poles (in order to provide tension to the surface). You may find this easier if you place the table on its end.
